

SMWI

WEDGE HOUSINGS

Surface mount wedge housing.

Wedge housing for larger camera and lens combinations.

The SMW1 offers dual security screw access and the option of surface run conduit to enter the enclosure directly without conversion to flexible conduit.

The enclosure has incorporated a multiposition camera mount bracket similar to the SMW5 with full access to one side of the camera. It is a general purpose wedge that suits a variety of mounting applications for larger camera and lens combinations.

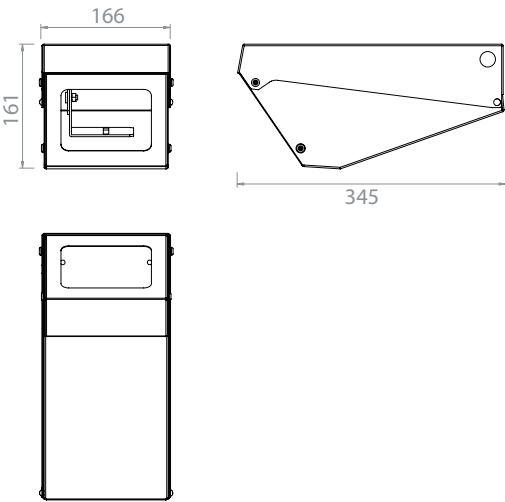

APPLICATIONS

Car parks, under eaves, railway platforms, tunnels, walls and walkways. An ideal general purpose enclosure for larger camera and lens combinations.
